## Projects

### e-NZU Project

Collaborating closely with a dedicated development team, I actively engaged in the transformational process of nurturing e-nzu in Rwanda. Our shared goal is to seamlessly guide international students to affordable accommodations through a web-based and mobile application.

### VoteSync

A sophisticated distributed application crafted using Java Remote Method Invocation (RMI) technology. This innovative system encompasses both client-side and server-side components, empowering students to engage in secure and efficient electronic voting for their leaders.

### Code Zone E-learning Platform

Designed to cater to coding enthusiasts and learners of varying expertise, this project seamlessly melds an intuitive user interface with versatile payment choices, making top-notch coding education accessible. The utilized technologies are as follows: HTML (58.9%), CSS (25.2%), PHP (14.4%), and JavaScript (1.5%).

## Personal Details

- Date of Birth : 4th,Feb,2001
- Marital Status : Single
